Venhart BRAND

ROPES AND TWINES

TECHNICAL INFORMATION

TOMATO TWINE

PRODUCT DESCRIPTION

Venhart's Tomato Twine is used mostly in greenhouses for tying tomatoes, capsicums, and other climbing plants to garden structures and trellises. It is a strong twine that absorbs minimal moisture, making it well-suited for use in free fall situations. With one cut, you can produce 50 identical lengths, offering efficiency and convenience.

The twine is designed with a loose winding to ensure strands separate cleanly without twisting or tangling. Its soft and flexible nature ensures gentle handling, avoiding any damage to the plants.

PRODUCT FEATURES

- Ideal for tying tomatoes, capsicums and climbing plants.
- Minimal moisture absorption.
- Suitable for free-fall tying applications.
- 50 identical lengths
- Loose winding allows tangle-free separation.
- Soft and flexible.
- Designed for efficient use in greenhouse applications.
- UV stabilised
