

Can't afford an automatic pallet wrapper?

That was before the Venus[®] M1540

This pallet wrapper is simplicity itself and yet it has all the features you'd expect in a much more expensive machine - two pre-programmed automatic cycles or totally manual operation, soft turntable start and stop, automatic turntable homing and a photo eye pallet height detector. It also has an adjustable spring brake film tensioner and an optional loading ramp.

Fork lift slots for easy re-location.

MANUAL OPERATION

Use the Start, Stop and Pause buttons to remain in total control of the wrapping process.

AUTOMATIC OPERATION

Simply select program 1 or 2 and press the start button. That's it! Program 1 applies 2 extra bottom wraps and 1 extra top wrap. Program 2 applies 3 extra bottom wraps and 2 extra top wraps.

OPTIONS

- Large turntable diameter: 1650mm
- Increased pallet height: 2600mm
- Loading ramp: 1160mm x 1000mm
