

SUPER CELLO CONSTANT

PRODUCT DESCRIPTION

The Audion Super Cello is a handheld constant heat sealer designed for on-location sealing applications. With a 4.5 metre power cord, users can easily move around the item to seal packages. Featuring two PTFE-coated crimp seal jaws, this sealer allows adjustable sealing temperatures ranging from 60°C to 248°C, accommodating various material types and thicknesses including cellophane and PP.

Both seal jaws are heated and efficiently distribute heat when sealing cellophane, wax coated paper, and foil laminates. Note: Audion Super Cello is not suitable for use with polyethylene (PE) as it may stick to the seal jaws.

PRODUCT FEATURES

- Ideal for use where items must be sealed at their location.
- Seal Temperature 60°C to 248°C.
- Electrical Requirement 240V.
- 12 month warranty.
- Servicing + spare parts available.
