

SISAL LASHING

PRODUCT DESCRIPTION

Venhart's Sisal Lashing is available in one, two, and three-ply centre-draw spools, and is slightly oiled to resist moisture and weathering. An environmentally friendly and inexpensive option without compromising on quality, this lashing features low elongation and a rustic appearance. The fibrous surface gives a firm hand grip and holds knots strongly.

PRODUCT FEATURES

- Natural fibre construction made from natural sisal fibre, providing a practical and sustainable alternative to synthetic lashing materials.
- Offers good tensile strength for lashing, securing, bundling and tying applications.
- The natural texture provides excellent knot holding, while its flexible and lightweight construction makes it easy to tie and handle.
- Versatile for a range of applications and suitable for lashing, landscaping, gardening, parcel tying, agricultural use and retail or presentation applications.
- Biodegradable and eco-friendly option ideal for zero-waste projects and applications where reducing synthetic materials is important.
