

Our strongest silage film ever!

Venus[®] POWER

Venus POWER 5 layer LLDPE silage stretch film is made in Europe. It has high (280g) instant tack for an air-tight seal with minimal tails. Apply a minimum of 6 layers for maximum nutritional value.

83% more* Impact resistance

Greater impact strength means more puncture resistance, due to the revolutionary 5 layer construction. That means minimum risk of damage from hard crops and during handling, transportation and storage

12.5% more* UV resistance

Venus POWER silage film is made to suit Australian conditions. It is UV stabilised to resist up to 180 kilolanglely.

3% more* tear resistance

Greater tear resistance means minimum risk of the film breaking on high speed balers due to abrupt starts or stress at the corners of square bales. (*Machine direction)

*Compared to other leading brands

Properties	Unit	Other leading brands	Venus POWER
Impact resistance	grams	207	380
UV resistance	kly	160	180
Tear resistance MD#	grams	175	180
Tear resistance TD##	grams	831	780
Tacking	grams	280	280
