

TOTALCOVER® PRO

State of the art technology has made possible this high quality, competitively priced knitted HDPE netwrap. Totalcover® Pro is designed to spread right to the edge of a bale to produce well-formed, secure bales.

With superior quality net strength, Totalcover® Pro is your trusted net for the toughest baling jobs. This technically advanced netwrap is characterized by its superior quality and ability to adapt perfectly to any type of crop, even in the harshest of conditions.

Totalcover® Eco is available in 11gms per linear metre with 260 to 280kgf break force and Totalcover® Pro available in 12.3 gm per linear metre with 290 to 310kgf break force for straw crops and more extreme baling conditions.
