

Carton Staplers

Our range of Venhart carton staplers includes various manual and air-assisted hand staplers and box bottomers. All staplers are used for heavy duty carton sealing and high volume stapling projects.

CM Series
Hand Stapler

CM Series Hand Staplers

The hand operated CM series hand staplers have a comfortable plastic handgrip and a large finger screw for variable staple depth adjustment. The spring seated magazine retracts for easy unjamming and holds 100 staples. Its output is approximately 80 staples per minute.

CN Series Hand Staplers

The air operated CN series hand staplers have a lightweight design with a comfortable trigger. Its output is approximately 80 staples per minute.

CP Series Box Bottomers

The Venhart CP series box bottomers close the bottom of cartons using the retractable anvil stapling system. The sturdy welded steel construction features a large foot pedal for easy and efficient operation. The magazine holds 240 staples and has an output of approximately 80 staples per minute. To use this device the operator must invert the empty carton and place the unclosed box over the post. When the foot pedal is pressed the staple head firmly staples the box flaps together and the carton bottom is sealed. Servicing and spare parts are available.

Weight: 40kg

CPN Series Box Bottomers

The Venhart CPN series box bottomers are air assisted. These models feature a solid and sturdy welded steel construction with a fixed foot pedal. To use, the operator places the inverted carton on the box bottomer post with the flaps closed. The stapler is triggered by the pneumatic foot switch which firmly applies a staple across the bottom flaps. Depending on the size of the carton, two, three or more staples may be applied using this method before the bottom of the carton is firmly sealed.

This model is an excellent choice for mid to high level output; and features easy air assisted operation at approximately 120 staples per minute, while the magazine holds 150 staples. The air supply is adjustable via the pressure regulator from 30 to 145 psi. Servicing and spare parts are available.

Weight: 48kg
