

VH480 WATER ACTIVATED TAPE DISPENSER

PRODUCT DESCRIPTION

The VH480 Water Activated Tape Dispenser features a sturdy steel design and a fine toothed blade for precision cutting. The dispenser has rubber feet to prevent it from slipping and a plastic water reservoir with a fabric-covered roller. This dispenser can be loaded with Venhart VG803, VG80, VR70 or No. 70 water-activated tapes.

Load the tape dispenser with water-activated tape and fill up the water reservoir. When dispensed, the recyclable water-activated tape is instantly adhesive and ready for application.

See our video 'How to load the Venhart VH480 Water-Activated Tape Dispenser' for more information. This can be found on our website.

PRODUCT FEATURES

- Ideal for carton and satchel sealing
- For use with water-activated tapes
- Environmental choice for parcel and satchel closure
