

# ISM 620 HEAVY DUTY IMPULSE SEALER

## PRODUCT DESCRIPTION

A heavy-duty, electrically driven table-top impulse sealer designed for demanding packaging tasks. The ISM delivers consistent high-quality seals on PP (Polypropylene) and PE (Polyethylene) films, in addition to thicker or laminated films, while offering precise control over seal and cooling times and rugged construction for intensive use.

Please note that the additional stand, working table and film roll rack are optional extras by special order.

## PRODUCT FEATURES

- **Easy-to-use:** Simple digital control panel, requires minimal operator training
- **Bi-active sealing bars:** Enables you to seal most modern film types incl. laminates
- **No compressed air needed:** Easily movable to other part of the area, plug in and seal
- **Industrial seal wire tensioners:** High-quality seal and preventing wearing of the PTFE strips
- **Low maintenance:** Seal wire fasteners accommodate lower wearage. Wearing parts quickly replaceable.
- **Versatile application:** Ready-made bags / Tubular film / Tabletop / Support-mounted
- **Semi-automatic:** Electrical foot operation and automatic opening after finish of seal cycle

## MACHINE SPECIFICATIONS

Seal Length	420, 620, 1020mm
Seal Width	5mm
Pedal operated	Yes
Max. Film thickness	2 x 200 Micron
Power (460/620/1020)	950/1500/1100W
Voltage	230V – 1ph – 50/60Hz
Type of film	Ready Made Bags / tubular film PP (Polypropylene), PE (Polyethylene), Laminates
Dimensions	507 x 309 x 202 mm
Machine weight (incl. pedal)	16,9 Kg
