

VHIB/IV HEAT SEALER

VHIB/IV 300

PRODUCT DESCRIPTION

The VHIB IV is the most economically priced of the Venus VHIB line of benchtop impulse heat sealers. It has an adjustable timer (0.2 to 1.5 seconds) with solid state (SCR) Thyristor relay. Simplify your packaging process with this easy, cost-effective, and attractive solution for a wide range of products, from packing foods to apparel, in polythene and polypropylene bags.

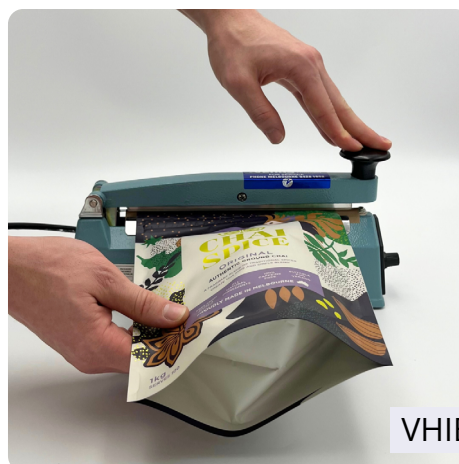

PRODUCT FEATURES

- Convenient and cost-effective method for sealing tubing PP and Poly bags.
- Ensures the protection and preservation of various products – often used in the food industry to maintain freshness, prevent contamination, and extend shelf life.
- Suitable film: polypropylene and polythene bags and tubing.
- Starter friendly heat sealer with a “plug-and-play” design in mind
- Spare parts available.
